

# Woocommerce Stote

Creation and configuration

# Wordpress multiSite configuration

For more flexibility in work its better to have a one dashboard for all your stores inside worpress panel

So now we are going to configure your panel to make that happen

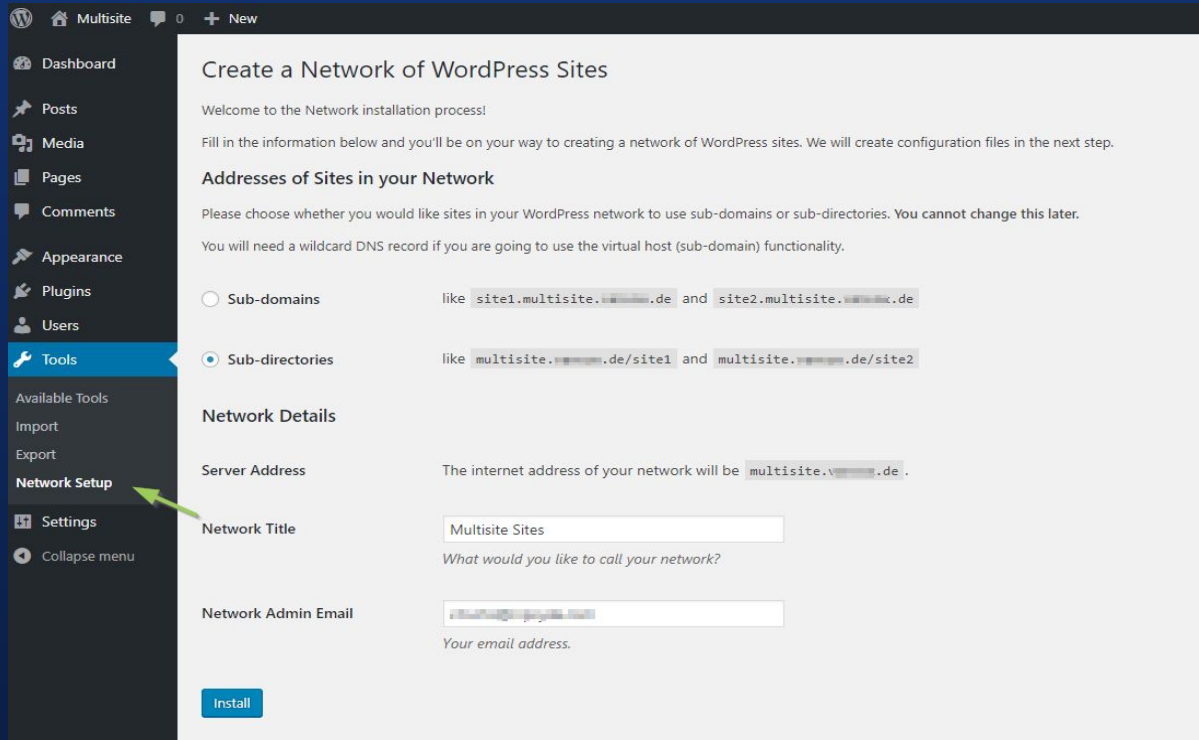

# Allow Multisite in wp-config.php

First of all modify on wp-config.php you can find it in the main directory of your project wordpress and add the line below

```
66 $table_prefix = 'wp_';
67
68 /**
69  * For developers: WordPress debugging mode.
70  *
71  * Change this to true to enable the display of notices during development.
72  * It is strongly recommended that plugin and theme developers use WP_DEBUG
73  * in their development environments.
74  *
75  * For information on other constants that can be used for debugging,
76  * visit the Codex.
77  *
78  * @link https://codex.wordpress.org/Debugging_in_WordPress
79  */
80 define('WP_DEBUG', false);
81
82
83 /* Multisite */
84 define('WP_ALLOW_MULTISITE', true);
85
86 /* That's all, stop editing! Happy blogging. */
87
88 /** Absolute path to the WordPress directory. */
89 if ( !defined('ABSPATH') )
90     define('ABSPATH', dirname(__FILE__) . '/');
```

Next just save the file and go enable the multisite feature in your wordpress panel like the image :

**Network Setup**

Settings

Collapse menu

## Create a Network of WordPress Sites

Welcome to the Network installation process!

Fill in the information below and you'll be on your way to creating a network of WordPress sites. We will create configuration files in the next step.

### Addresses of Sites in your Network

Please choose whether you would like sites in your WordPress network to use sub-domains or sub-directories. You cannot change this later.

You will need a wildcard DNS record if you are going to use the virtual host (sub-domain) functionality.

☐ Sub-domains like `site1.multisite. .de` and `site2.multisite. .de`

☒ Sub-directories like `multisite. .de/site1` and `multisite. .de/site2`

### Network Details

**Server Address**

The internet address of your network will be `multisite. .de`.

**Network Title**

Multisite Sites

*What would you like to call your network?*

**Network Admin Email**

*Your email address.*

**Install**

Add the code in same file wp-config.php :

```
define('MULTISITE', true);
define('SUBDOMAIN_INSTALL', true);
define('DOMAIN_CURRENT_SITE',
'My Website');
define('PATH_CURRENT_SITE', '/');
define('SITE_ID_CURRENT_SITE',
1);
define('BLOG_ID_CURRENT_SITE',
1);
```

Add that second code in .htaccess file :

```
RewriteEngine On
RewriteBase /
RewriteRule ^index\.php$ - [L]

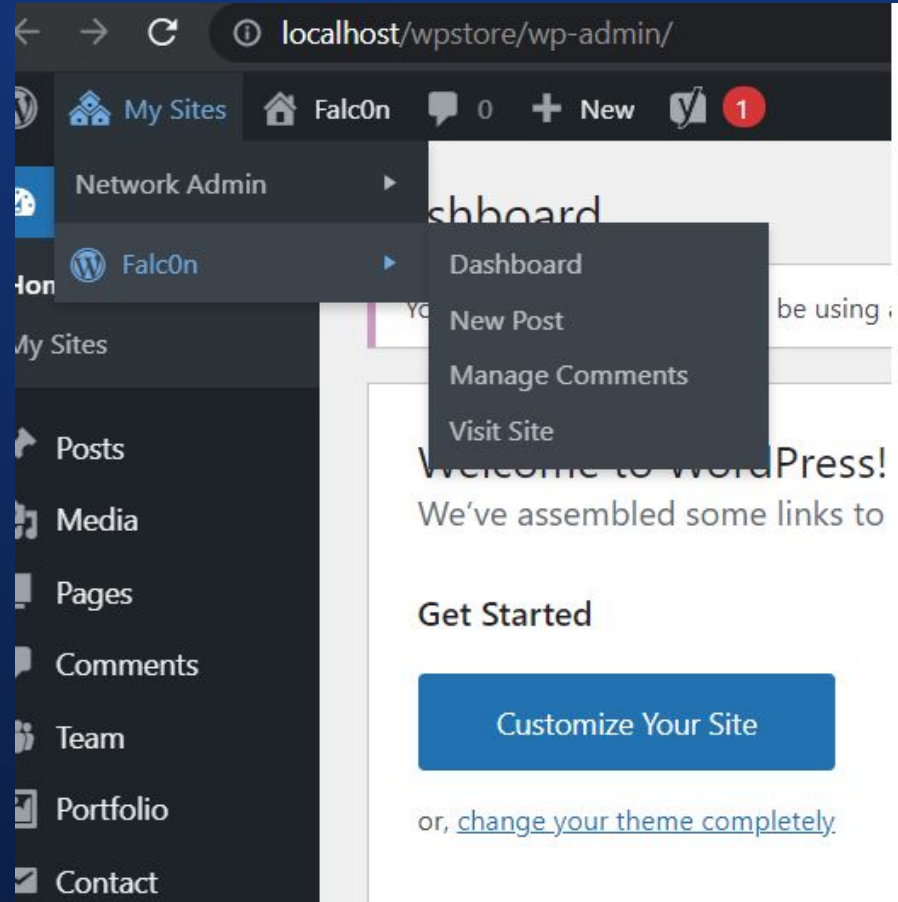

# add a trailing slash to /wp-admin
RewriteRule ^([_0-9a-zA-Z-]+)/?wp-admin$
$1wp-admin/ [R=301,L]

RewriteCond %{REQUEST_FILENAME} -f [OR]
RewriteCond %{REQUEST_FILENAME} -d
RewriteRule ^ - [L]
RewriteRule
^([_0-9a-zA-Z-]+)/?(wp-(content|admin|includes).*) $2
[L]
RewriteRule ^([_0-9a-zA-Z-]+)/?(.*\.php)$ $2 [L]
RewriteRule . index.php [L]
```

When you changed the *wp-config.php* and the *.htaccess*, log into your WordPress admin area again. In the upper admin bar, you now see the new menu *Network Admin*. It's displayed always, so you can always enter the admin area of the network, no matter on which site of your network you are.

Below the network administration, all sites of the network are listed to which you were added. By clicking on the names, you enter the backends of these sites.

Now let install our theme

**Savoy - Minimalist AJAX  
WooCommerce**

# AFFTER DOWNLOADING THE THEME :

 Assets	5/6/2021 1:58 PM	File folder	
 Documentation	5/6/2021 1:58 PM	File folder	
 Licensing	5/18/2021 2:23 PM	File folder
